

The Effect of Singing on Connected Speech

By Farshid Ashtiani

GRIN Verlag Sep 2015, 2015. Taschenbuch. Book Condition: Neu. 210x148x1 mm. This item is printed on demand - Print on Demand Titel. Neuware - Research Paper from the year 2015 in the subject English Language and Literature Studies - Linguistics, , language: English, abstract: The present study was an attempt to investigate the impact of English verbal songs on connected speech aspects of adult English learners' speech production. 40 participants were selected based on the results of their performance in a piloted and validated version of NELSON test given to 60 intermediate English learners in a language institute in Tehran. Then they were equally distributed in two control and experimental groups and received a validated pretest of reading aloud and speaking in English. Afterward, the treatment was performed in 18 sessions by singing preselected songs culled based on some criteria such as popularity, familiarity, amount, and speed of speech delivery, etc. In the end, the post-tests of reading aloud and speaking in English were administered. The results revealed that the treatment had statistically positive effects on the connected speech aspects of English learners' speech production at statistical .05 level of significance. Meanwhile, the results represented that there was not any...
