This compact, little pocket book - the first ever to feature the natural insect next to its matching artificial fly - arms the angler with all the information he needs to select the right fly from his flybox. Superb photographs of aquatic insects (larvae, pupae, adults) with the artificial flies positioned alongside them. Times of hatching. The geographical distribution. Whether it is a river fly or a lake fly, or both. Life cycles of the insects. Clues from the river and from the trout's behaviour.
