

Thermodynamics, Heat Motors, Refrigerating Machines

Filesize: 4.79 MB

Reviews

This written ebook is excellent. It is amongst the most awesome ebook i have study. You will not truly feel monotony at whenever you want of the time (that's what catalogs are for regarding if you ask me).

(Devante Langworth IV)

THERMODYNAMICS, HEAT MOTORS, REFRIGERATING MACHINES

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1891 edition. Excerpt: .121. In designing an engine of the Stirling type, the horse-power to be delivered and the number of revolutions per minute must be known, in addition to the data already assumed. The number of revolutions will be limited by the piston speed and the length of stroke. The average piston speed may be between 100 and 200 feet per minute. One of Stirling's engines, having a four-foot stroke, was run, in actual practice, at about 28 revolutions per minute, giving an average piston speed of about 22; feet per minute. An air engine, reported upon by M. Tresca, had a stroke of 0.4 In. (1.3 ft.) and made about 90 revolutions per minute, giving a piston speed of about 120 feet per minute. The large air engines in the steamer Ericsson had an average piston speed of 108 feet per minute. Let N = the number of revolutions per minute, S : the average piston speed, l = the length of stroke of the piston, z : number of horse-power required of the engine, W = the work required of the engine per minute; Let w = the number of pounds of working air required; then, since the work done by one pound per revolution will be theoretically, the value of U in equation (201), we have: But the actual work U will be less than the theoretical, and we will assume it to be 0.7, the theoretical. (In designing it is better to assume...
